## Setting up Inclusive Learning Environments

Presented by Dr Joy Zabala

On-Demand Presentation

In this presentation, Dr Joy Zabala will discuss strategies to support effective inclusive practices in educational environments. Dr Zabala will discuss the concept of Universal Design for Learning to identify the conditions that best support student learning outcomes in the classroom, in relation to assistive technology service design and delivery.

Dr Zabala will introduce the SETT framework – a flexible four-part tool intended to promote collaborative decision-making in assistive technology. The Framework highlights key factors that support inclusive learning environments and ways to promote collaboration within teams to create student-centred, environmentally useful and task-oriented tools that foster participation and achievement among students.

### Learning Outcomes

Participants will be able to:

- Identify the conditions that best support inclusion in the classroom through Universal Design for Learning principles
- Develop an understanding of the SETT framework and its relationship to Assistive Technology service design
- Identify and understand the order in which the four elements of the framework are considered
- Recognise the ways the framework supports inclusion and effective Assistive Technology decision-making
- Develop skills in decision-making using the SETT Framework as a tool

*Fully online, self-paced learning accessible for 4 weeks following registration*

*\$30.00 incl. GST*

*Participants who successfully complete this On-Demand Presentation will receive a certificate noting 2 hours of professional learning.*
